GUI and Web Development

Personal Website Development Assignment

Due Date: Friday 11th December @ 5pm

For this assignment, you must create a personal website that employs the principles of HTML and CSS learned in lectures.

The content of your page is up to you, but you must employ a common design theme and colour scheme throughout. Some suggestions: Family Page, Sports Page, Music Page, Favourite Movies Page, Friends Page, etc. or whatever you want.

Make sure to run it by the lecturer to ensure that it is suitable.

Requirements:
- At least **six pages**, including index.html.
- Appropriate and useful content
- HTML Text formatting
- Include Titles for each page
- Include meta tags
- Appropriate use of HTML lists
- Appropriate use of HTML links – both internal and external and if appropriate navigation to different sections on a long web page
- All links should work and you should use styling for the links using pseudo-classes
- Each page must have a menu of links to the other pages on the website
- Appropriate use of images on the website including an image as a link
- Appropriate use of HTML tables and forms
- Include audio or video on your website
- Include one external style sheet
- Make appropriate choices for colour and font
- Show your understanding of the CSS Box Model
- The website should employ a common **design theme and colour scheme** throughout and have a reasonably complex layout

Your grade will be determined by the following:
- Technical competence (everything appears that should)
- Presence of a title
- Correct HTML/CSS
- Links
- Aesthetic choices:
    - Legible text
    - Non-clashing colours
    - Reasonable use of space (items line up)
    - A clear focal point.
- Creativity
- Appropriateness to purpose
